Dear Friends and Colleagues,

Warm Greetings from KMCH institutions and Dept of Microbiology, KMCH-IHSR

The journey of the outcome-driven CBME curriculum for the Indian medical graduate - which is learner and patient centric - has begun with the first batch of medical students successfully landing at the microbiology departments of various medical schools across the country. Though the medical teachers of clinical microbiology are aware of the concepts and content of the CBME curriculum, they currently face implementation challenges in, moving from the well-known organism wise teaching to the new organ system wise teaching; the effective use of appropriate teaching, learning & assessment tools in the reduced allocated teaching hours; and mandatory performance documentation of students.

As an Institution with Educational excellence as its key focus, we at KMCH-IHSR bring eminent subject experts and authors of text books of the CBME curriculum in Microbiology from across the country, to address the challenges faced as a Medical Microbiology teacher, department or as an institution. This interactive virtual workshop aims at sharing best practices, standardized formats & templates and demonstrations with examples.
